Weight Capacity of Shower and Bath Seats

The ADA Code requires wall-mounted shower seats to have a weight capacity of at least 250 lbs. All Freedom Shower Seats meet this requirement when properly installed as per instructions.

Folding shower seats have been designed and manufactured to support loads exceeding the downward pull requirements for Federal specifications FHA, VA, HUD, hospital codes, and private construction.

The actual "in use" load-bearing capacity of any shower seat, however, will be limited by the strength of its mounting surface and installation hardware.
To meet the following weight capacities, all seats must be installed with wood-backing in the wall, where mounting flanges attach to the wall, and only used as intended.

Maximum weight capacity:

APFSSB/L/R- Wall supported seats without legs	250 lbs.
APF Bath seats (Trifold, Removable, Portable, End-mounted)	250 lbs.
APFSHAFSL- Slimline decorator seats	300 lbs.
APFSHAF185- Highback decorator seats	400 lbs.
APFSHAFB - Bariatric high-back seat with legs	800 lbs.
APFSSB2-/APFSL2/R2-Wall mounted seats with swing-down legs	900 lbs.
APHSS- Slatted, folding shower seats, no legs.	500 lbs.
APZ- Aluminum Rolling Shower Commode Chairs	286 lbs. to 440 lbs., depending on chair size
