

Weight Capacity of Wall Mounted Shower Seats

The ADA Code requires wall mounted showers seats to have weight capacity of at least 250 lbs. All Freedom Shower Seats meet this requirement when properly installed as per instructions.

Folding Shower seats have been designed and manufactured to support loads exceeding the downward pull requirements for Federal specifications FHA, VA, HUD, hospital codes, and private construction.

The actual "in use" load bearing capacity of any shower seat, however, will be limited by the strength of its mounting surface and installation hardware.

To meet the following weight capacities, all seats must be installed where there is wood backing in the wall, where mounting flanges attach to the wall.

Maximum weight capacity:

APF Wall supported seats without legs 250 lbs.

APF Wall mounted seats with swing down legs 900 lbs.

APCSD Wall mounted seats with swing down legs 400lbs.

APM seats with 2 legs 558lbs.

(For the **APM** seats with Back and arms: The arms can support up to 122lbs.)
