

## Freedom Resin Contour Shower Seat

Comfort & Security – White Resin Shower Seats  
 With durable stainless steel frames

HH – Series  
 Contour  
 Shower Seat  
 18"

### Application Use:

### Specifications

The contour shower seat is manufactured using high quality 12 gauge, type 304 stainless steel. The all stainless steel barrel of the seat allows the bottom to fold up and sit flat against the wall when not in use ( $2\frac{7}{8}$ " projection when closed). 1" thick white resin plastic slats are durable and easy to keep clean. The two upper slats are removable to access the 8 wall mounting screw ports ( $2\frac{1}{2}$ " stainless screws included). The installation of the contour seat is simple, easy, and quick. It is imperative when installing a shower seat to consult with a qualified contractor to insure you have the sufficient backing to support the seat.

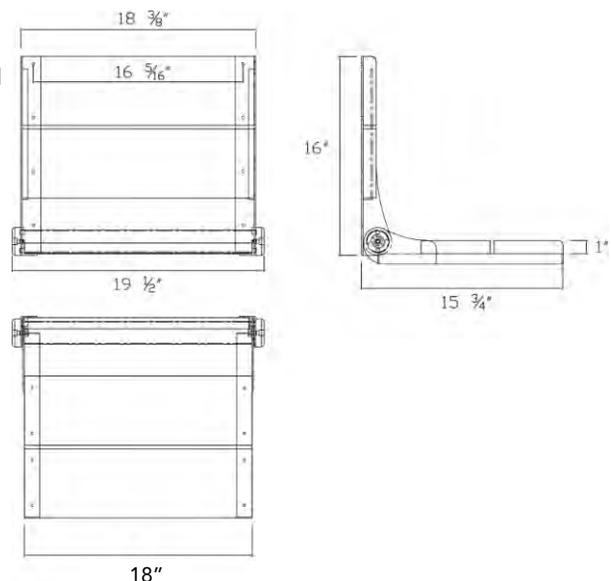

## The Contour Bathing Collection

The contour shower seats are designed and tested to exceed 500lbs and come in both 18" and 26" wide versions.
